Fake news detection using Natural language processing

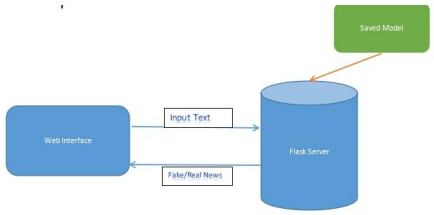
Date	29 September 2023
Project Id	Proj_212171_Team 1
Project name	Fake news detection using nlp
Maximum marks	

Problem solution:

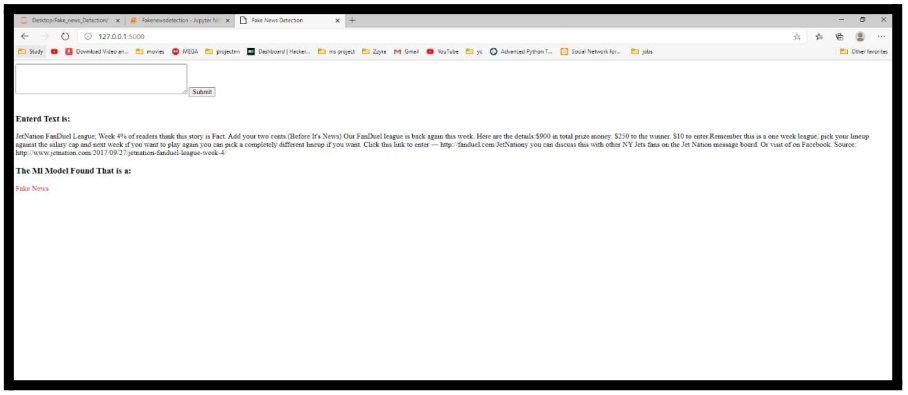
ML model Deployment

For Deploying we need to create a sample web interface which will get the text from the user and then send it to the flask server.In the flask server we will use the saved model model.plk to predict the news is real or fake and then return the result to the user through web interface.

ML model Deployment



The examples are,



The ultimate goal is to get as deep an understanding of the product and its users as possible.
